💼 EXPERIENCE

Associate Software Engineer, *Prolifics, Inc.* ↗   2023/07 – present — Hyderabad, India

- Successfully migrated and optimized legacy procedures from DB.net code to MySQL, enhancing database efficiency and reliability.
- Engineered a robust healthcare system for Circle Health Group using Java and Spring Boot.
- Generated actionable insights through business intelligence reports.

Java developer intern, *Aixtor Technology*   2022/12 – 2023/05 — Ahmedabad, India

- Created portlets, themes, and layouts, integrating third-party systems with Liferay.
- Enhanced user experience by delivering efficient web applications.

📁 PROJECTS

Disney clone, *React.js, API Integration* ↗

- Developed a Disney+ streaming service clone using React.js for the frontend.
- Implemented API integration for data extraction to display movies and TV shows.
- Deployed the application, ensuring a seamless user experience with modern design and responsive features.

Asset Management

The project has finished with the help of the SpringBoot framework, MySQL, and a client API Postman. The goal is we can perform CRUD operations on a particular asset according to our needs and assign tasks to a particular person.

AI Foundary

I made valuable contributions to the project by implementing the UI using React and connecting it to a Python API, enriching the overall functionality and user experience.
